Prateek Shinde

Software Test Engineer

Mob: **+91-7038897670**   Email: **prateekshinde018@gmail.com**   Location: **Navi-Mumbai, India**

PROFESSIONAL SYNOPSIS

• Having 3+ years of Experience in Software testing on Investment Banking and Internet Banking.
• Excellent knowledge of the Scrum process and the Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC).
• Implemented Agile Methodology process in the project and work on Tools like HP-ALM, JIRA
• Excellent background in evaluating the Sprint Backlog User Stories.
• Proficiency with identification of test scenarios, test case design, test case execution, defect analysis, and defect report writing.
• Participate in scrum meeting to discuss about project progress report every day.
• Performed different kind of testing like Sanity Testing, Smoke Testing, Functional Testing, Retesting, Regression Testing.

EXPERIENCE

Manual Test Engineer

Cognizant Technology Solutions

Global IT services company specializing in technology and consulting

- Followed Agile Scrum methodology as part of SDLC
- Participated in daily scrum, sprint planning, review, and retrospective meetings
- Analyzed business requirements, collaborated with developers and QA teams
- Prepared test scenarios, test cases, and requirement traceability matrices
- Conducted Sanity, Functional, Retesting, Regression, and Database testing
- Used JIRA and HP ALM for test management and defect tracking
- Writing extensive bug reports
- Developed and executed 65 test scenarios and 210 detailed test cases, along with preparing 6 requirement traceability matrices (RTMs) to ensure complete functional and business coverage
- Validated outputs in database tables using SQL queries
- Prepared daily and weekly test status reports for management review

SKILLS

➢ **Testing Skills:** Functional Testing, Regression Testing, Retesting, Smoke Testing, Sanity Testing, E2E Testing, SIT, Acceptance Testing, UAT, Boundary Value Analysis

➢ **Test Artifacts:** Test Planning, Test Case Design, Requirement Traceability Matrix (RTM), Test Scenarios, Bug Reporting

➢ **Tools:** JIRA, HP ALM, Postman, MySQL Workbench

➢ **Processes:** Agile, Scrum, STLC, SDLC

EDUCATION

Bachelor of Engineering (CSE)

VTU   Belagavi

PROJECTS

Project 1: HSBC Equity Trade Book System

Domain: Investment Banking

Client: HSBC, United Kingdom

- Examined business requirements, system requirements, and interacted with developers and QA team.
- Prepared test scenarios, designed test cases, and reviewed them.
- Contributed in daily Scrum, sprint planning, review, and retrospective meetings as part of the agile process.
- Performed functional testing, smoke testing, retesting, and regression testing.
- Generated status reports and shared them with the management team in a timely manner.
- Involved in behavioral, input domain, error handling, calculation, and service level testing.
- Used Postman to validate API request/response flows for fund transfer and account services modules, ensuring accurate payloads, status codes, and transaction responses.
- Authenticated real-time trade flows including order placement, modification, cancellation, execution, and trade confirmation, ensuring data integrity.

Project 2: Operations of Users and Employees

Domain: Internet Banking

Client: Union Bank of India

- Tested fund transfer functionality using RTGS, NEFT, and IMPS
- Ensured smooth operation of user and employee portals within Internet Banking
- Performed end-to-end functional, integration, and regression testing
- Understanding the (SRS) requirements and project functionalities
- Investigated SRS requirements and mapped them to detailed test scenarios and test cases for complete coverage
- confirmed backend transactions and fund movement using SQL queries, ensuring correct data flow across systems
